

Get smart about your coolants!

Three problems....one fix: a solution for tramp oil, solids, and biological control

The CoolantLoop™ Coolant Recycling Centers are based on decades long successful fluid treatment practices, using the award-winning, multipatented SmartSkim® Systems approach to solving problems. By getting the fluids out of dirty sumps, all three types of coolant contamination problems – tramp oil, solids, and bacteria – can be easily and effectively solved. SmartSkim® is the industry standard!

Typical benefits of recycling coolants

- Reduce your cost of purchasing new coolant by 45% to 75%
- Cut your cost of coolant disposal 50% to 90%
- Improve tool life and product quality
- Follow ISO, OSHA and EPA “Best Practices”
- Eliminate environmental risks and liability of off site disposal
- Safeguard worker health & safety
- Reduce overall coolant maintenance costs
- Minimal operator involvement and training
- System payback typically 3 – 9 months
- Everything you need for successful recycling
- Designed for easy installation
- Simple, efficient operation. Delivered ready to start
- **No electrical panel necessary. Plant air only. Just plug & play!**
